Profile

Results-oriented Junior Front End Developer dedicated to creating and optimizing interactive, user-friendly, and feature-rich websites and apps.

Half a year ago after successfully finishing my education and accomplishing several pet projects I landed a job in start-up company.

I have used core JS, React, Redux. I've also mastered HTML5 & CSS3.

I have experience of agile methodology and working within Jira and Trello.

I have experience in conducting communications with English native speakers in both written and verbal form.

Employment History

Junior Front End Developer, VTlabs, Kiev

FEBRUARY 2020 — JULY 2020

Creating modular, responsive sites and apps using modern CSS techniques and JavaScript libraries.
